🆎 Bilingual in English & Chinese   </> Python & C   🏴 Canadian & Hong Konger

Summary

I am a recent PhD graduate in astronomy & astrophysics from the University of Toronto. My research broadly focused on how to adopt and adapt **deep learning** methodology and **Foundation Model for science** to analyze big cross-domain cross-survey datasets to help us better understand the formation history and **dynamics of our MilkyWay Galaxy**. Most of my codes and models are well tested, well documented and open sourced to support open science.

EDUCATION

Ph.D. in Astronomy & Astrophysics, University of Toronto   2020-2024
Dissertation title: "Exploring the Milky Way with Deep Learning"
Advisor: Prof. Jo Bovy

M.Sc. in Astronomy & Astrophysics, University of Toronto   2019-2020

H.B.Sc. in Astronomy & Physics, University of Toronto   2014-2019

PUBLICATION OVERVIEW

I am an author on **14 refereed papers** that have **2550+** citations (h-index=11). Excluding 2 collaboration papers, there are **12 refereed papers** that have **750+** citations. Details of my ORCID (0000-0002-0036-2752) associated publications can be accessed on Astrophysics Data System (ADS).

MAJOR AWARDS & FELLOWSHIPS

Data Science Institute Doctoral Student Fellowship   2023-2027
University of Toronto
CAD $75,000$

SOFTWARE

Most of my research are open-sourced including codes for publications: `https://github.com/henrysky`. This includes a few software packages that are well tested and well documented, for example:

astroNN ⌨
Deep Learning for Astronomers with Keras

Galaxy10 ⌨
A CIFAR10-like galaxy image dataset

milkyway_plot ⌨
A handy package for plotting face-on and all-sky MilkyWay with Matplotlib and Bokeh

MyGaiaDB ⌨
Setup local serverless Gaia/2MASS/ALLWISE/CATWISE databases and run query locally with python

I have also contributed to several open-source software packages, for example:

galpy ⭘
Galactic Dynamics in python
- Implemented DOP-853, an explicit Runge-Kutta method of order 8(5,3) numerical integer in Python and C
- Improved 2D animation rendering performance and implemented 3D animation using plotly.js

mwdust ⭘
Dust maps in the Milky Way
- Implemented necessary Hierarchical Equal Area isoLatitude Pixelation of a sphere (HEALPix) functionality in C
- Improved out-of-the box user experience on Linux/MaxOS/Windows by using Python instead of system packages

python-fsps ⭘
Python bindings to Flexible Stellar Population Synthesis (FSPS) Fortran code
- Fixed various compilation issues such that the code is usable on Windows

PUBLICATIONS

First/Second Author (8 papers, ordered by date):

[0 cites] 2024, arXiv240715703L / arXiv:2407.15703
Estimating Probability Densities with Transformer and Denoising Diffusion
Henry W. Leung, Jo Bovy & Joshua S. Speagle

[13 cites] 2024, MNRAS.527.1494L / arXiv:2308.10944
Towards an astronomical foundation model for stars with a transformer-based model
Henry W. Leung & Jo Bovy

[17 cites] 2023, MNRAS.522.4577L / arXiv:2302.05479
A variational encoder-decoder approach to precise spectroscopic age estimation for large Galactic surveys
Henry W. Leung, Jo Bovy, J. Ted Mackereth & Andrea Miglio

[35 cites] 2023, MNRAS.519..948L / arXiv:2204.12551
A measurement of the distance to the Galactic centre using the kinematics of bar stars
Henry W. Leung, el al.

[156 cites] 2019, MNRAS.490.4740B / arXiv:1905.11404
Life in the fast lane: a direct view of the dynamics, formation, and evolution of the Milky Way's bar
Jo Bovy, **Henry W. Leung**, el al.

[133 cites] 2019, MNRAS.489.2079L / arXiv:1902.08634
Simultaneous calibration of spectro-photometric distances and the Gaia DR2 parallax zero-point offset
with deep learning
Henry W. Leung & Jo Bovy

[169 cites] 2019, MNRAS.483.3255L / arXiv:1808.04428
Deep learning of multi-element abundances from high-resolution spectroscopic data
Henry W. Leung & Jo Bovy

[4 cites] 2017, JAVSO..45...30P / arXiv:1611.03334
Studies of the Long Secondary Periods in Pulsating Red Giants. II. Lower-Luminosity Stars
J. R. Percy & **Henry W. Leung**

Contributing Author (6 papers, ordered by date):

[6 cites] 2023, MNRAS.526.1997P / arXiv:2306.09319
Decoding the age-chemical structure of the Milky Way disc: an application of copulas and elicitable maps
Aarya A. Patil, Jo Bovy, Sebastian Jaimungal, Neige Frankel, **Henry W. Leung**, el al.

[45 cites] 2022, ApJS..260...32W / arXiv:2108.08860
Chemical Cartography with APOGEE: Mapping Disk Populations with a 2-process Model and Residual Abundances
David H. Weinberg, el al. (includes **Henry W. Leung**)

[715 cites] 2022, ApJS..259...35A / arXiv:2112.02026
The Seventeenth Data Release of the Sloan Digital Sky Surveys: Complete Release of MaNGA, MaStar, and APOGEE-2 Data
Abdurro'uf, el al. (Collaboration paper; includes **Henry W. Leung**)

[1081 cites] 2020, ApJS..249....3A / arXiv:1912.02905
The 16th Data Release of the Sloan Digital Sky Surveys: First Release from the APOGEE-2 Southern Survey and Full Release of eBOSS Spectra
Romina Ahumada, el al. (Collaboration paper; includes **Henry W. Leung**)

[11 cites] 2020, MNRAS.494.2268W / arXiv:1910.01646
Searching for solar siblings in APOGEE and Gaia DR2 with N-body simulations
Jeremy J. Webb, Natalie Price-Jones, Jo Bovy, Simon Portegies Zwart, Jason A. S. Hunt, J. Ted Mackereth, **Henry W. Leung**, el al.

[166 cites] 2019, MNRAS.489..176M / arXiv:1901.04502
Dynamical heating across the Milky Way disc using APOGEE and Gaia
J. Ted Mackereth, Jo Bovy, **Henry W. Leung**, el al.
